

HELLO MUSICIAN! MEET YOUR CHORD FILES DARK HARMONY

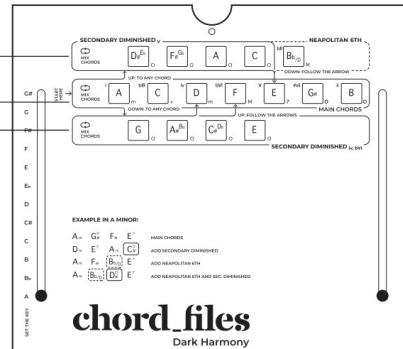

SECONDARY DIMINISHED CHORDS
AND NEAPOLITAN 6TH CHORD
WHICH LEAD TO THE V CHORD

MAIN CHORDS

Here you will find the basic
chords of a selected key, which is
set using the slider ('set the key').

SECONDARY DIMINISHED CHORDS
WHICH LEAD TO THE iv OR bVI CHORD

FRONT: names of the chords

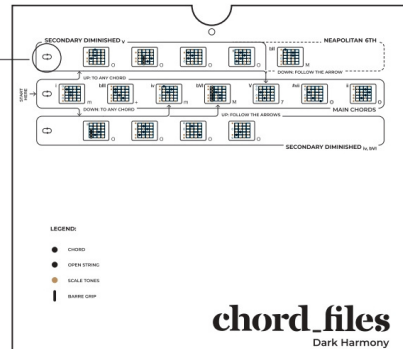

BACK: chord diagrams with
corresponding scale tones
(in the same order as on the front)

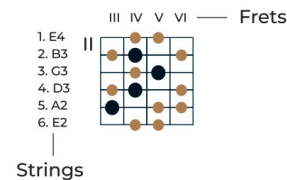

MIX CHORDS

This symbol indicates that in this
section you may freely choose chords
and combine them into progressions.

HOW TO READ DIAGRAMS?

- chord
- open string
- scale tones
- ▮ barre grip

Legend: M = major key; m = minor key; 7 = dominant seventh chord; b – flat
 (example: Ab = A-flat; # – sharp (example: F# = F-sharp); bIII – flattened 3rd degree
 of the scale); Roman numerals = indicate the scale degree that the chord occupies

HOW TO CREATE CHORD PROGRESSIONS?

Set the key and start with 'Main Chords'. You may begin with any chord
and create progressions freely within this section. We suggest starting
with one of the stable chords. The tonic i, subdominant iv, subdominant
parallel bVI or the Dominant V (if played as a Major chord, without the 7th).

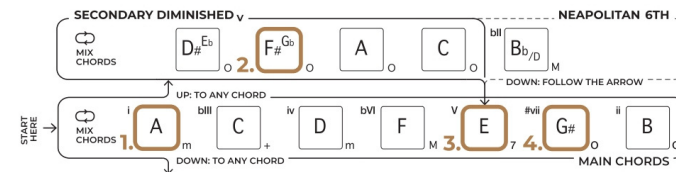

EXAMPLE:

1. 2. 3. 4.
Am - FM - B° - E(7)
i - bVI - ii - V

To create more complex progressions, move to the section above or below.

ADD A SECONDARY DIMINISHED CHORD THAT RESOLVES TO V CHORD

If you wish to add a secondary diminished chord, move up from any
chord in the 'Main Chords' section to any of the chords above. The arrow
then indicates which chord is to be followed - the V chord in the 'Main
Chords' section.

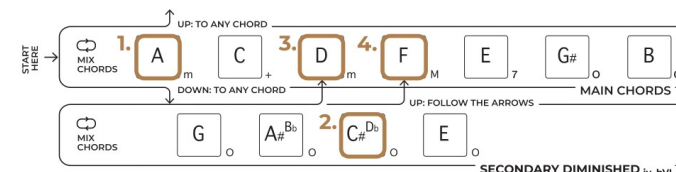

EXAMPLE:

1. 2. 3. 4.
Am - F#° - E(7) - G#°
i - vii° - V - #vii

ADD A SECONDARY DIMINISHED CHORD THAT RESOLVES TO iv or bVI CHORD

Move down from any chord from the 'Main Chords' section to any of
the chords below. The arrow then indicates which chord is to be
followed - the iv or bVI chord in the 'Main Chords' section.

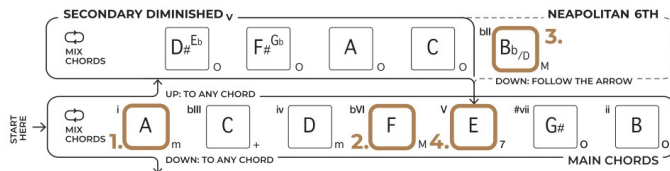

EXAMPLE:

1. 2. 3. 4.
Am - C#° - Dm - FM
i - vii° - iv - bVI

ADD A NEAPOLITAN 6TH CHORD

If you wish to add a Neapolitan chord, move to the upper right section from any chord in the 'Main Chords' section. The arrow then indicates which chord is to be followed - the Dominant (V) chord in the 'Main Chords' section.

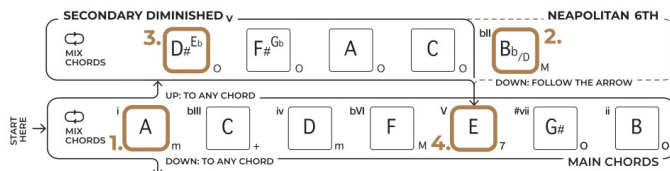

EXAMPLE:

1. 2. 3. 4.
Am - FM - BbM/D - E7
i - bVI - bII - V

Tip: A Neapolitan chord is usually played as a Major chord in the 1st inversion (e.g. BbM/D), but you can also play it as a 'normal' Major chord in the root position (e.g. BbM).

ADD A NEAPOLITAN 6TH AND A SECONDARY DIMINISHED CHORD

A Neapolitan chord usually resolves to the Dominant (V) chord but you can also add a secondary diminished chord in the upper left section before resolving to the Dominant (V) chord.

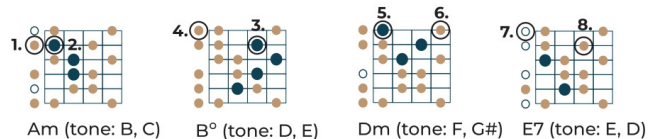

EXAMPLE:

1. 2. 3. 4.
Am - BbM/D - D#° - E7
i - bII - vii° - V

AN EXAMPLE OF HOW TO USE SCALE TONES

The black dots indicate chord tones and the golden dots depict scale tones, which you can use when composing a melody. The numbers (1, 2, 3, 4, 5, 6, 7, and 8) indicate the sequence of tones comprising the melody.

We show you the possibilities,
you be creative.
