

HELLO MUSICIAN! MEET YOUR CHORD FILES

SECONDARY DOMINANTS

Dominant chords of the keys indicated with arrows.

MAIN CHORDS

Here you will find the basic chords of a selected key, which is set using the slider ('set the key').

MODAL INTERCHANGE

Chords from the parallel minor key.

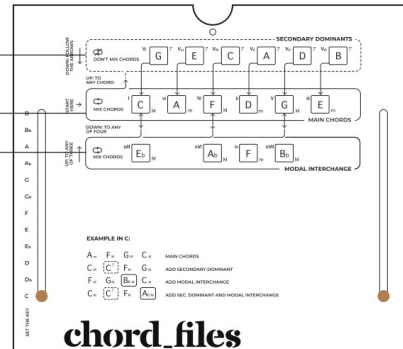

DON'T MIX CHORDS

This symbol indicates that in this section you may not freely choose chords and combine them into progressions. The arrow indicates which chord follows your selected chord.

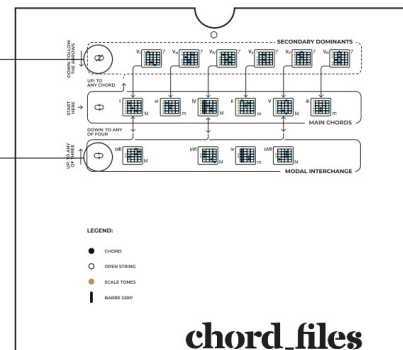

MIX CHORDS

This symbol indicates that in this section you may freely choose chords and combine them into progressions.

FRONT: names of the chords

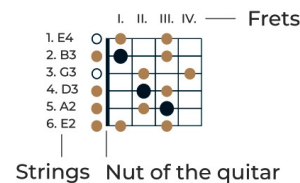

BACK: chord diagrams with corresponding scale tones (in the same order than front)

HOW TO READ DIAGRAMS?

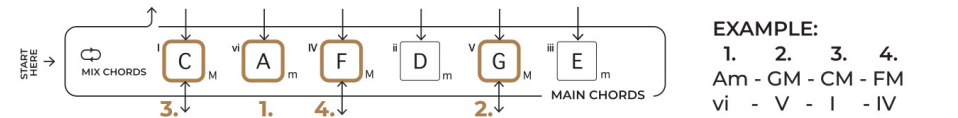

- chord
- open string
- scale tones
- | barre grip

Legend: M = major key; m = minor key; 7 = dominant seventh chord; b – flat (example: A_b = A-flat; # – sharp (example: F# = F-sharp); bIII – flattened 3rd degree of the scale); Roman numerals = indicate the scale degree that the chord occupies

HOW TO CREATE CHORD PROGRESSIONS?

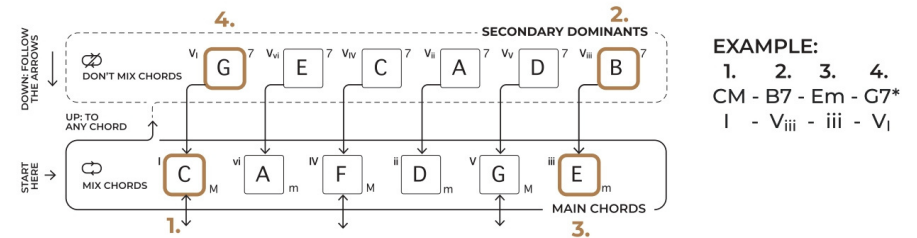

Set the key and start with 'Main chords'. You may start with any chord and create progressions freely within this section. The main chords of the key are highlighted in white (tonic I, subdominant IV, dominant V).

To create more complex progressions, move to the section above or below.

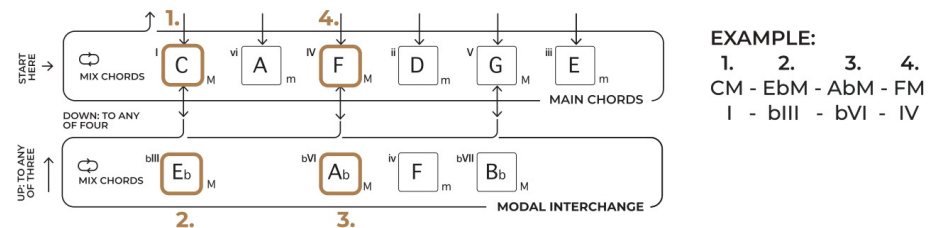

ADD A SECONDARY DOMINANT

If you wish to add a secondary dominant, move up from any chord from the 'Main chords' section to any of the chords above. The arrow then indicates which chord is to be followed by the selected chord.

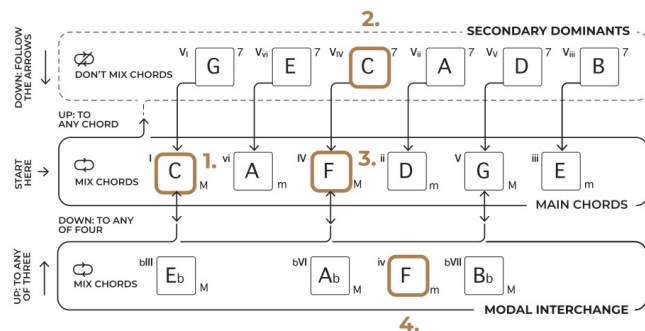

ADD A CHORD FROM THE PARALLEL MINOR KEY

If you wish to add chords from the parallel minor key, move down from the three main scale degrees (I, IV, or V) from the section 'Main chords' to any of the chords below. To return to the 'Main chords' section, also move through degrees I, IV, or V.

*** Exception:** in this section you will also find a chord labelled V_i. This is the dominant seventh chord of the primary key ('Main chords') and is therefore not a 'true' secondary dominant. However, it was included in the 'Secondary dominants' section because it follows the same rule as other secondary dominants.

ADD A SECONDARY DOMINANT AND A CHORD FROM THE PARALLEL MINOR KEY

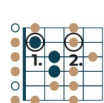

EXAMPLE:

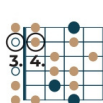

1. 2. 3. 4.
CM - C⁷ - FM - Fm
I - V_{IV} - IV - iv

AN EXAMPLE OF HOW TO USE SCALE TONES

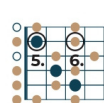

The black dots indicate chord tones and the golden dots depict scale tones, which you can use when composing a melody. The numbers (1, 2, 3, 4, 5, 6, 7, and 8) indicate the sequence of tones comprising the melody.

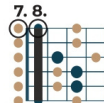

Am (tone: C, D)

GM (tone: B, C)

CM (tone: C, D)

FM (tone: E, F)

We show you the possibilities,
you be creative.
